

SOCAT TRAINING & TECHNICAL ASSISTANCE CENTER (TTAC) CONTENT EXPERT NETWORK

We're creating a network of experts who can conduct trainings and do consultation on a variety of mental health topics that benefit children, youth, young adults, and families. Our goal is to have a group to call on when there is a resource or training needed anywhere across Tennessee.

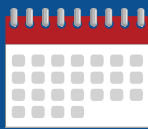

TA THAT CONTENT EXPERTS MAY PROVIDE INCLUDES:

- **Training** – provided to increase knowledge about a specific topic
- **Consultation** – one-on-one, targeted support around a specific need or problem

WHAT TO EXPECT:

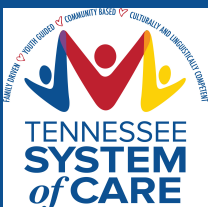

TTAC receives training and/or consultation request and reaches out to content expert about related topic.

If content expert's schedule allows, they agree to conduct training and/or consultation.

TTAC and content expert work together to plan and execute training and/or consultation requested.

TTAC Mission: To promote system of care values and principles through providing quality resources, training, and consultation to youth and young adults with behavioral health needs, their families, and those who serve them.

TTAC Vision: To support a statewide system of care in Tennessee.

TTAC Purpose: To foster healthy, resilient, and collaborative communities.
